

WORKSHOP

INDÚSTRIA CERÂMICA 4.0

2 fevereiro 2017

Juan Boix Palomero, Chemical Engineer and has a Master's Degree in Ceramic Materials Science, Technology and Applications from the Jaime I University (Castellón, Spain). Since 2006, he is the head of the unit for Machines and Process Control which belongs to the Area of Industrial Processes of ITC.

Juan Boix has participated in diverse projects of Research and development and Technological Advice, most of them privately funded by different companies such as ceramic tiles manufacturers, frits and glaze producers and machinery for the ceramic industry, tiles and bricks. He has also collaborated in public project granted by different entities at regional national and European level. Juan Boix Palomero has co-authored 14 scientific publications and has participated in 12 communications to congresses, mainly in the field of ceramic process. His works have been very focused in the pressing of ceramic powders, as well as in the handling operations associated to this process stage.
