WORKSHOP
INDÚSTRIA CERÂMICA 4.0
2 fevereiro 2017

Ricardo Teresa Ribeiro received the B.Sc. degree in radiology from the Lisbon School of Health Technology, Polytechnic Institute of Lisbon, M.Sc. degree in Health business management from the Évora University and Ph.D. degree in biomedical engineering at the Institute for Systems and Robotics, Instituto Superior Técnico from the Technical University of Lisbon in collaboration with the University of Lisbon Medical School.

He was Adjunct Professor at Lisbon School of Health Technology until spring 2015. Currently he is COO and co-founder of PKNOA, S.A., the birthplace of DataSonar platform –a disruptive big data platform that is changing the way we deal with data! His research / professional interests include the use of signal processing, machine learning and computer vision concepts to model and solve data and business problems. He is also engaged in the development of the startup ecosystem.
